Basis of presentation

The unaudited condensed financial statements have been prepared in accordance with United States generally accepted accounting principles for interim financial statements and with the instructions to Form 10-QSB and reflect all adjustments which, in the opinion of management, are necessary for a fair presentation. All such adjustments are of a normal recurring nature. The results of operations for the interim period are not necessarily indicative of the results to be expected for the full year. Certain amounts in the prior year statements have been reclassified to conform to the current year presentations. The statements should be read in conjunction with the financial statements and footnotes thereto included in the Company's Form 10KSB for the year ended December 31, 2006.

Management's Plan of Operations

We have begun to develop more significant revenue through the operations of our new segment Signature Minnesota which provides consulting services. We cannot anticipate at this time that enough positive internal operating cash flow until such time as we can generate sustained and substantial revenues. In the event we cannot obtain the necessary capital to pursue our strategic plan, we may have to cease or significantly curtail our operations. This would materially impact our ability to continue operations.

Our near term cash requirements are anticipated to be offset through the receipt of funds from private placement offerings and loans obtained through private sources. Since inception, we have financed cash flow requirements through debt financing and issuance of common stock for cash and services. As we expand operational activities, we may continue to experience net negative cash flows from operations and will be required to obtain additional financing to fund operations through common stock offerings and bank borrowings to the extent necessary to provide working capital.

Over the next twelve months we believe that existing capital and anticipated funds from operations may not be sufficient to sustain operations and planned expansion. Consequently, we may be required to seek additional capital in the future to fund growth and expansion through additional equity or debt financing or credit facilities. No assurance can be made that such financing would be available, and if available it may take either the form of debt or equity. In either case, the financing could have a negative impact on our financial condition and our Stockholders.

We anticipate that we may incur additional operating losses over the next twelve months. Our recently developed sources of revenue, as compared to our prior operating history makes predictions of future operating results difficult to ascertain. Our prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies in their development stage. Such risks include, but are not limited to, an evolving and unpredictable business model and the management of growth. To address these risks we must, among other things, obtain a customer base, implement and successfully execute our business and marketing strategy, continue to develop and upgrade technology and products, respond to competitive developments, and attract, retain and motivate qualified personnel. There can be no assurance that we will be successful in addressing such risks, and the failure to do so can have a material adverse effect on our business prospects, financial condition and results of operations.

Going Concern

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. As shown in the accompanying financial statements, the Company has incurred recurring losses, used significant cash in support of its operating activities and, based upon current operating levels, requires additional capital or significant reconfiguration of its operations to sustain its operations for the foreseeable future. These factors, among others, may indicate that the Company will be unable to continue as a going concern.

The financial statements do not include any adjustments relating to the recoverability and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. The Company's continuation as a going concern is dependent upon its ability to generate sufficient cash flow to meet its obligations on a timely basis and ultimately to attain profitability. The Company has limited capital with which to pursue its business plan. There can be no assurance that the Company's future operations will be significant and profitable, or that the Company will have sufficient resources to meet its objectives.
